EDUCATION

University of California at Los Angeles

2013-2018

Ph.D. in Mathematics Los Angeles, CA

Advisor: Russel E. Caflish

Thesis: "Accelerated First-Order Optimization with Orthogonality Constraints"

University of California at Santa Cruz

2009-2013

B.Sc. (Honors) in Mathematics Santa Cruz, CA

ACADEMIC APPOINTMENTS

Assistant Research Professor

2021-present

Pennsylvania State University

University Park, PA

Postdoctoral Scholar 2018-2021

Pennsylvania State University University Park, PA

RESEARCH PAPERS

Published

- Uniform Approximation Rates and Metric Entropy of Shallow Neural Networks. Research in the Mathematical Sciences 9.3:1-21, 2022. With Limin Ma and Jinchao Xu.
- Optimal Convergence Rates for the Orthogonal Greedy Algorithm. *IEEE Transactions on Information Theory* 68.5:3354-3361, 2022. With Jinchao Xu.
- High-Order Approximation Rates for Shallow Neural Networks with Cosine and $ReLU^k$ Activation Functions. Computational and Applied Harmonic Analysis 58:1-26, 2022. With Jinchao Xu.
- Approximation rates for neural networks with general activation functions. *Neural Networks* 128:313-321, 2020. With Jinchao Xu.
- Accuracy, Efficiency and Optimization of Signal Fragmentation. *Multiscale Modeling and Simulation* 18(2):737–757, 2020. With Russel Caffisch and Hung Hsu Chou

- Accelerated Optimization with Orthogonality Constraints. *Journal of Computational Mathematics* 39(2):207–226, 2020.
- Compact Support of L^1 Penalized Variational Problems. Communications in Mathematical Sciences 15(6):1771-1790, 2017. With Omer Tekin.

After First Revision

- A Priori Analysis of Stable Neural Network Solutions to Numerical PDEs. First Revision Submitted to Mathematics of Computation, 2021. With Qingguo Hong and Jinchao Xu. Preprint available at: https://arxiv.org/abs/2104.02903
- Training Sparse Neural Networks using Compressed Sensing. First Revision Submitted to IEEE Transactions on Neural Networks and Learning Systems, 2021. With Jianhong Chen, Pengchuan Zhang and Jinchao Xu.

Preprint available at: https://arxiv.org/abs/2008.09661

• The Extended Regularized Dual Averaging Method for Composite Optimization. First Revision Submitted to Journal of Computational Mathematics, 2021. With Jinchao Xu. Preprint available at: https://arxiv.org/abs/1904.02316

Under Review

- Sharp Bounds on the Approximation Rates, Metric Entropy, and n-widths of Shallow Neural Networks. Submitted to Foundations of Computational Mathematics, 2021. With Jinchao Xu. Preprint available at: https://arxiv.org/abs/2101.12365
- An efficient greedy training algorithm for neural networks and applications in PDEs. Submitted to Journal of Computational Physics, 2021. With Xianlin Jin, Wenrui Hao, and Jinchao Xu. Preprint available at: https://arxiv.org/abs/2107.04466
- Characterization of the Variation Spaces Corresponding to Shallow Neural Networks. Submitted to Constructive Approximation, 2021. With Jinchao Xu. Preprint available at: https://arxiv.org/abs/2106.15002
- Extensible Structure-Informed Prediction of Formation Energy with Improved Accuracy and Usability employing Neural Networks. Submitted to Computational Materials Science, 2021. With Adam Krajewski, Zi-Kui Liu, and Jinchao Xu. Preprint available at: https://arxiv.org/abs/2008.13654
- Accelerated First-Order Methods: Differential Equations and Lyapunov Functions. Submitted to Journal of Computational Mathematics, 2021.

Preprint available at: https://arxiv.org/abs/1903.05671

GRANTS

Penn State Institute for CyberScience Seed Grant (co-PI) 2018-2019 "Deep Learning for CALPHAD Database Development and Uncertainty Quantification" \$35,000

NSF DMS-2111387 (co-PI)

2021-2024

"Comparative Study of Finite Element and Neural Networks Discretizations for Partial Differential Equations" \$550,000

TEACHING EXPERIENCE

Pennsylvania State University	Fall 2021
Instructor	University Park, PA
Math 141 - Integral Calculus	

Pennsylvania State University	Spring 2021
$Co ext{-}Instructor$	University Park, PA
M 1 FFF O P	

Math 555 - 0	Optimization	Theory (Graduate	Course)

Pennsylvania State University	Fall 2020
Instructor	University Park, PA
Math 140 - Differential Calculus	

Pennsylvania State University	Spring 2020
Instructor	University Park, PA
Math 251 - Differential Equations	
Math 251H - Honors Differential Equations	

Pennsylvania State University	Fall 2019
Instructor	University Park, PA
Math 141 - Integral Calculus	

Pennsylvania State University/Peking University	Summer 2019
$Co ext{-}Instructor$	Beijing, China
Math 497 - Introduction to Deep Learning	

Pennsylvania State University	Fall 2018
Instructor	University Park, PA
Math 141 - Integral Calculus	

University of California, Los Angeles	2014-2017
Teaching Assistant	Los Angeles, CA
Math 32B - Integral Vector Calculus	
Math 32A - Differential Vector Calculus	
Math 110B - Finite Group Theory	

INVITED SEMINAR AND CONFERENCE TALKS

Rensselaer Polytechnic Institute Mathematica in Imagina Data and Ontimination Common	October 6, 2021
Mathematics in Imaging, Data and Optimization Seminar	
RWTH Aachen	October 4, 2021
Applied Mathematics Group Lunch Seminar	
ETH Zurich	June 2, 2021
FoMICS Seminar Talk and Lecture	
University of Texas, Austin Applied Mathematics Seminar	May 21, 2021
University of California, San Diego CCoM Seminar	May 11, 2021
Purdue University Mathematical Data Science Webinar	May 10, 2021
University of Notre Dame ACMS Applied Mathematics Seminar	April 15, 2021
University of California, Irvine Computational Mathematics Seminar	March 15, 2021
California Institute of Technology CMX (Computational Mathematics) Seminar	February 17, 2021
Pennsylvania State University CCMA Workshop on Mathematical Machine Learning and Applications	December 15, 2020
INVITED MINI-SYMPOSIUM TALKS	
Kunming, China International Multigrid Conference (IMG)	August 15, 2019
AMS Fall Western Sectional Meeting Special Session on Theoretical and Applied perspectives in Machine Learning	October 23, 2021

SERVICE

Students Co-Advised

- Jianhong Chen, Penn State Graduate Student, 2019-2020
- Xianlin Jin, Peking University Graduate student, 2021-present

Conferences Co-Organized

• CCMA Workshop on Mathematical Machine Learning and Applications, December 14-16, 2020.

Seminars Co-Organized

• Computational and Applied Mathematics (CAM) Colloquium at Penn State, Fall 2020-Fall 2021

Ad-Hoc Reviewer for

 Mathematical Programming, Neural Networks, AISTATS, Numerical Algorithms, Calculus of Variations and Partial Differential Equations, Expert Systems with Applications, IEEE Transactions on Neural Networks and Learning Systems, SIAM Journal on Optimization, Journal of Machine Learning Research, SIAM Journal on Mathematics of Data Science, SIAM Journal on Numerical Analysis

AWARDS AND SCHOLARSHIPS

University of California, Los Angeles

2018

• Pacific Journal of Mathematics Dissertation Award

University of California, Los Angeles

2013-2014

• University of California Regents Fellow

University of California, Santa Cruz

2012

• Stephen M. Palais Award

University of California, Santa Cruz

2011

• Putnam Mathematical Competition Honorable Mention

AFFILIATIONS

American Mathematical Association (AMS)	
Society of Industrial and Applied Mathematicians	(SIAM)

2021-present 2021-present

INDUSTRY EXPERIENCE

Google Intern

June 6, 2016-August 26, 2016

Mountainview, CA

I worked with the Network Architecture team on improving the efficiency of a Monte Carlo network reliability simulation. Specifically, I implemented importance sampling, which reduced the number of samples required by a factor of 3.

Google Intern

June 12, 2017-September 1, 2017

Los Angeles, CA

I worked with the Budgetplanner Team (a division working on advertisement). I built a data processing pipeline that collected and processed data which was scattered across multiple relational databases to create training data for a machine learning model. Then I used TensorFlow to design and test multiple machine learning models on the resulting dataset.

TECHNICAL STRENGTHS

Programming Skills: C/C++, Java, Matlab, Latex, Python
